LAKE COUNTRY LUTHERAN

Pathways Program

An Individualized Education for Every Student

The Lake Country Lutheran Pathways Program provides juniors and seniors with the opportunity to explore future careers through focused pathways in:

1. Business
2. Engineering
3. Medical Sciences
4. Ministry & Education

The program combines rigorous academics with intentional career exploration, leadership development, college planning, and standardized test preparation. Students participate in a weekly Pathways Seminar on Tuesday during Student Support Time, where they receive personalized guidance and hear from professionals in their field of interest. Through the Pathways Program, students are equipped with a clear plan for life after graduation, preparing them to become

Leaders Prepared by Faith.

Program Components

Enhanced College & Career Planning
A comprehensive two-year academic program that provides individualized planning to help every student identify their strengths, explore future opportunities, and pursue their God-given calling.

Standardized Test Preparation
Built-in ACT/SAT preparation, equipping students with proven strategies, practice opportunities, and expert guidance to maximize college admissions and scholarship potential.

University & College Tours
Expanded access to college visits that give students firsthand exposure to a wide range of academic and professional opportunities.

Pathways Lecture Series
Regular presentations from Christian leaders in business, healthcare, engineering, law, ministry, and other fields who inspire students to lead with faith, purpose, and excellence in every vocation.

Business

- **Foundational business and finance coursework** covering personal finance, economics, and business principles.
- **Leadership and management studies** that develop strategic thinking, communication, and organizational skills.
- **Entrepreneurship and business application** experiences focused on marketing, law, ethics, and launching innovative ideas.

Engineering *(COMING IN 2027)*

- **Advanced mathematics and science coursework** that builds the analytical foundations essential for engineering.
- **Engineering experiences** that introduce students to design, problem-solving, and technology applications.
- **Hands-on technical learning** that prepares students for college engineering programs and careers in innovation, manufacturing, and STEM fields.

Medical

- **Advanced science coursework** in biology, chemistry, anatomy & physiology that provides a strong pre-health foundation.
- **Healthcare-focused learning** that introduces students to medical terminology.
- **Research, analysis, and communication skills** that prepare students for future study in medicine, nursing, and allied health professions.

Ministry & Education

- **Biblical and theological studies** that deepen students' understanding of God's Word and Christian doctrine.
- **Communication and leadership coursework** that builds skills in teaching, public speaking, counseling, and ministry leadership.
- **Education and social sciences experiences** that prepare students for careers in ministry, teaching, and Christian service.
